

TEAM HANDBOOK

Everything you do in Trailer Check, in the order you'll do it — from signing in to getting a pickup past QC. Every screen in this book is a real screenshot of the app.

ROLE: EMPLOYEE

13 CHAPTERS

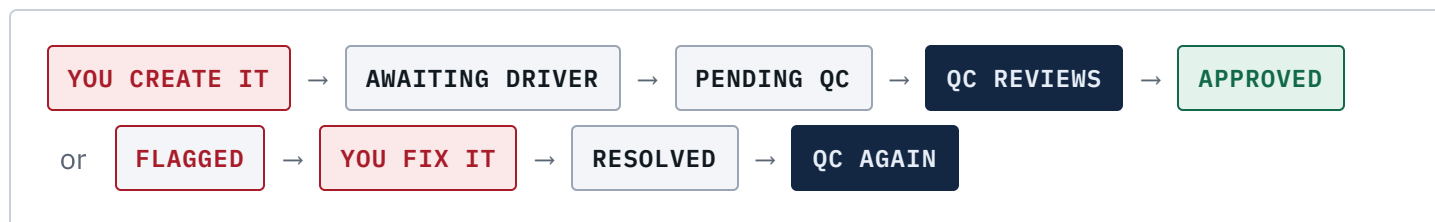

READ ONCE, KEEP OPEN

01 WHAT THIS SYSTEM IS FOR

Trailer Check replaced the shared spreadsheet. Every trailer pickup is a **ticket**. A ticket is not finished when you save it — it's finished when QC approves it.

Your job is the first half of that: put a complete, truthful ticket in front of QC as fast as you can. The app decides on its own whether a ticket is complete. You never pick a status — you fill in fields, and the ticket moves itself.

The life of a ticket

THE ONE RULE TO REMEMBER

You never move a ticket forward by clicking a status button. You move it forward by **filling in what's missing**. The moment the last required field is satisfied, the ticket jumps to **PENDING QC** by itself.

The statuses you'll see

STATUS	WHAT IT MEANS	WHOSE MOVE
STILL SENDING	A draft you parked on purpose. Invisible to QC until you submit it.	Yours
AWAITING DRIVER	Saved, but something required is still missing — or you're waiting on a scale ticket.	Yours
PENDING QC	Complete. It's in the QC queue now.	QC's
FLAGGED	QC rejected it and told you why. It's on your Carryover board.	Yours
RESOLVED	You fixed it and resent it. Back in the QC queue.	QC's
APPROVED	Passed. +10 to your score.	Nobody's — unless a scale ticket is still open.

APPROVED IS NOT ALWAYS "DONE"

If the pickup needed a scale ticket and you haven't checked **Scale ticket received**, the row stays on the Carryover board *even after QC approves it*. Approval ends the audit; it does not end the scale chase.

ABOUT THE SCREENSHOTS IN THIS BOOK

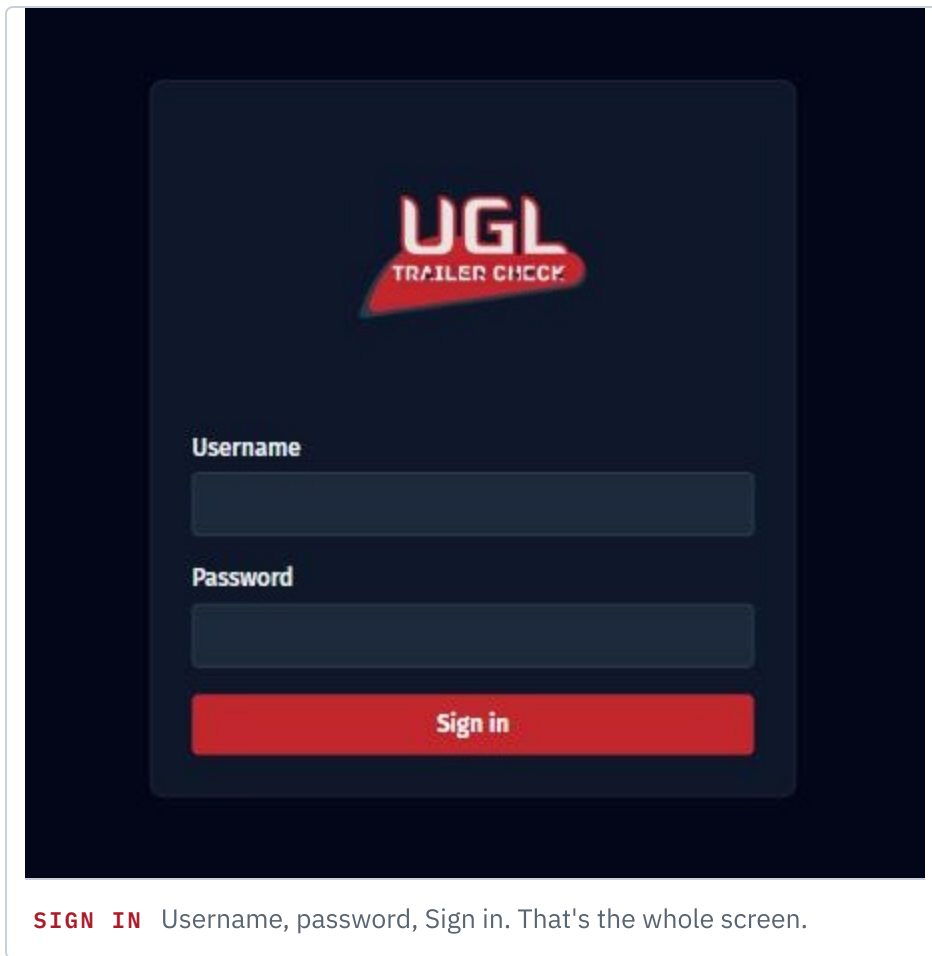

Truck numbers, driver names and carriers in these screenshots are practice data. Your screen will show real loads. If your computer is set to a light theme the colours will be lighter than shown here — the layout and every button are in exactly the same place.

02 SIGNING IN

Your manager creates your account and hands you a username and password. There is no "sign up" — if you don't have an account, ask your manager, not the app.

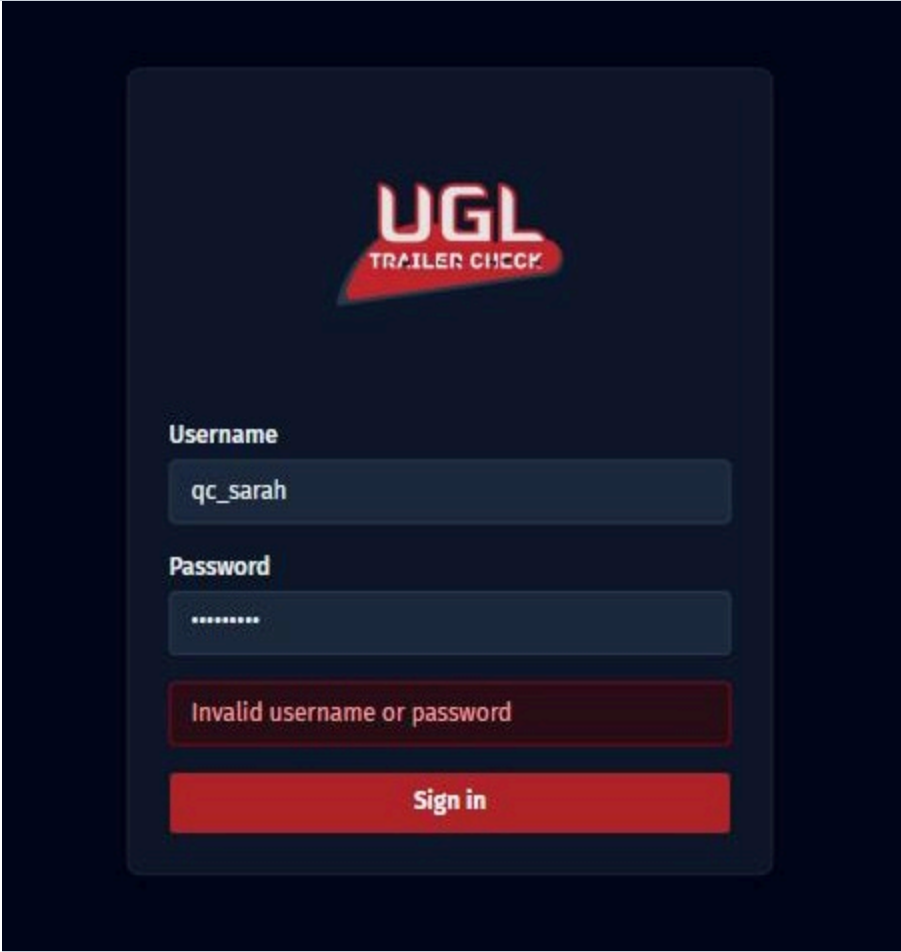

1

Open the Trailer Check address your manager gave you. You land on the sign-in card.

2

Type your username and password and press **Sign in** (or just hit Enter). A wrong password shows a red bar and nothing else happens — no lockout, try again.

The screenshot shows a login interface for 'UGL TRAILER CHECK'. It features a dark blue background with a central white box containing the login fields and buttons. The 'Username' field contains 'qc_sarah' and the 'Password' field contains a masked password. A red error message 'Invalid username or password' is displayed below the password field. A red 'Sign in' button is at the bottom of the form.

BAD PASSWORD "Invalid username or password." Check caps lock, then try again.

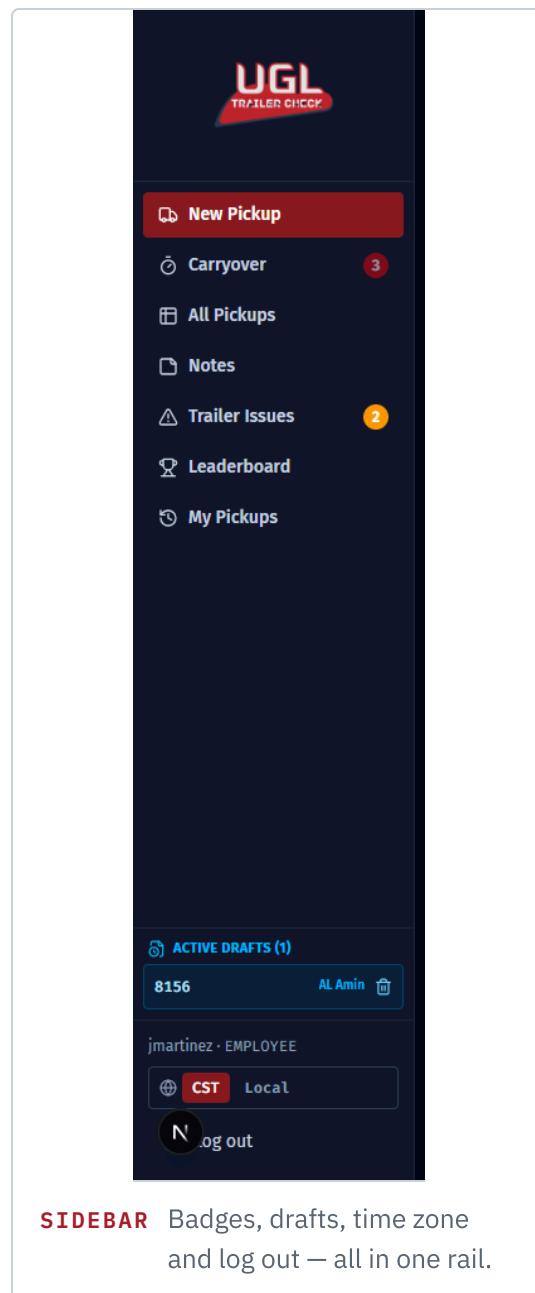

IF THE PAGE HANGS FOR A FEW SECONDS

The server sleeps when nobody's using it. The first sign-in of the morning can take 10–30 seconds and you may see a "waking up" message. Wait — don't keep clicking Sign in.

You stay signed in for 8 hours. After that you'll be bounced back here. Use **Log out** at the bottom of the sidebar if you share a computer with another shift.

03 READING YOUR SCREEN

Everything lives in the left sidebar. It never moves. Learn these seven items and you know where everything is.

ITEM	WHAT IT'S FOR
New Pickup	The intake form. Where every ticket starts.
Carryover	Your action list: tickets QC flagged, plus everything still waiting on a scale ticket.
All Pickups	The whole team's board, read-only. Use it to answer "did anyone already do this truck?"
Notes	Shift handover. Auto-writes itself from your open gaps.
Trailer Issues	Physical trailer problems QC found. Not your fault, not your score — but somebody has to chase them.

ITEM	WHAT IT'S FOR
Leaderboard	Team ranking by accuracy and speed.
My Pickups	Every ticket you've ever created.

The badges

Red number on Carryover Flagged tickets waiting on you. It pulses. Clear it before the end of your shift.	Amber number on Trailer Issues Open trailer problems on the whole team's board. Calmer on purpose — it's a nudge, not an alarm.	Score pill, top right Your running performance score. Starts at 100. +10 per approval, minus a penalty per flag.
--	--	---

Active Drafts

Anything you parked with **Save Draft (Still Sending)** sits here. Click the truck number to pick the form back up exactly where you left it; click the bin icon to throw the draft away if the load got cancelled.

CST vs Local

The / toggle changes only how times are *printed* on your screen. It does **not** change which shift a ticket belongs to — shifts are always Central Time, wherever you're sitting.

SHIFT	CENTRAL TIME WINDOW
First	1:00 AM – 9:00 AM
Main	9:00 AM – 5:00 PM
Third	5:00 PM – 1:00 AM (crosses midnight)

Anything between midnight and 1:00 AM counts as the *previous* day's Third shift.

Pop-up messages

Small boxes appear at the bottom-right and disappear after about 12 seconds. Red = something needs you now (QC flagged your ticket). Amber = a reminder (items still missing,

open trailer issues).

Movable Mudflap ☐ (Left) ☐ (Right) ☐

REMINDER An amber nudge about open trailer issues, shown just after signing in.

2 open trailer issue(s) — e.g. truck 5120: "Rear passenger-side mudflap bracket is cracked — not the dispatcher's miss, but shop needs to see it before the next load." Check Trailer Issues and follow up.

FULL-WIDTH RED BAR ACROSS THE TOP

That is the **hazmat movement alert**. UGL does not haul hazmat. If a load someone marked as hazmat starts rolling, every person logged in gets that bar, with the truck number and its speed. It stays up until someone dismisses it. Tell your manager immediately — don't just dismiss it.

04 CREATING A PICKUP

This is the job. The form is long but it always runs in the same order, top to bottom: Truck → Trailer & Papers → PTI → Documents & Condition → Save.

EMPTY FORM Only the two red-starred fields are required to save: Motor Carrier and Truck Number.

Step 1 — Truck

1

Pick the **Motor Carrier** from the dropdown, then type the **Truck Number**. Get the carrier right first — the truck lookup only searches inside that carrier's fleet.

2

Wait about a second. Driver, Location, Model and Fuel % fill themselves in from the truck's telematics. Every one of those four fields is still yours to type over if the feed is wrong.

AUTO-FILL Driver, location, model and fuel arrive on their own. Overwrite anything that looks wrong.

IF NOTHING FILLS IN

You'll get a small grey hint instead. That means the truck isn't in that carrier's fleet — usually the wrong carrier, or a typo in the number. It does **not** stop you saving; type the driver and location by hand and carry on.

Step 2 — "Still using trailer ...?"

3

If this truck was here before, a box pops up the moment you finish typing the truck number, showing what it pulled last time.

LAST TIME OUT What this truck pulled before, and what was verified on that ticket.

- **Yes, same trailer** — copies the trailer number and its PTI date into the form. Nothing else.
- **No, different trailer** — closes the box and leaves the form alone.

CONFIRMING DOES NOT VERIFY ANYTHING

It fills in the trailer number and PTI date only. The papers and the PTI boxes stay *unticked* on purpose — you verify those fresh for this load, every time. Never treat the pop-up as "already checked".

Step 3 — Trailer & papers

4

Type the **Trailer Number**. It's optional on a normal pickup — but type it anyway. The trailer number is what makes the inspection and registration papers stick to that trailer forever.

As soon as a trailer number is present, a **Saved papers** box appears:

- **Save Inspection paper / Save Registration paper** — upload a file.
- **Paste** — paste a screenshot, a photo, or a copied link. If nothing happens when you click Paste, click it again and press Ctrl+V.

WHY THIS SAVES YOU TIME

Papers are saved against the *trailer*, not this ticket. The next time that trailer shows up — next week, behind a different truck, on somebody else's shift — the papers are already attached. Upload once, never again.

5

LOT trailers

Flip **LOT Trailer** on for a trailer that lives on our own lot rather than arriving with the load. Two things change:

- Trailer Number becomes **required** (it gets a red star).
- A **Last PTI Date** field appears, with a warning if that date is stale.

The screenshot shows the 'New Pickup' form in the UGL Trailers app. The form is divided into several sections: 'TRUCK' with fields for Motor Carrier, Truck Number, Driver Name, Location, Model, and Fuel %; 'TRAILER & PAPERS' with fields for Trailer Number and Last PTI Date, and a warning message; 'PTI VERIFICATION' with a 'Master verification' checkbox and a 'PTI not sent yet - log your follow-up' section; and 'TRAILER' with checkboxes for 'Side DOT Tape' and 'Rear DOT Tape'.

LOT TRAILER ON A stale PTI date puts the warning in amber and forces a fresh PTI check.

THE 7-DAY LOT RULE

A LOT trailer can go to QC **without** a fresh PTI only if its last PTI is **less than 7 days old**. At 7 days or more you must tick the master PTI box. The form tells you which case you're in, in plain words, right under the date.

Step 4 — PTI verification

This panel has two separate things in it, and mixing them up is the single most common mistake new team members make.

One checkbox. **This alone** is what marks PTI as done and what QC's gate reads.

25 lines. A log of what you saw in the video. It **never** blocks anything.

6

Watch the driver's PTI video. Tick the master box. Then use **Select All** (top right) or tick individual rows to record what you actually saw.

Chassis loads

The screenshot shows the 'UGL HAZARDOUS WASTE' interface. On the left is a sidebar with navigation options: New Pickup, Carryover (3), All Pickups, Notes, Trailer Issues (1), Leaderboard, and My Pickups. Below this is a section for 'ACTIVE DRAFTS (1)' showing a draft for 'B156' with 'All Items' and 'jmartinez - EMPLOYEE' as the user. The main area is divided into two panels. The top panel, titled 'CHASSIS', contains a list of inspection items with status indicators (Left, Right, and a central checkmark): Side DOT Tape, Rear DOT Tape, No Placards Attached, Movable Mudflap, Tires and Rims, Brakes and Suspension, Airlines, Front Clearance Light, Side Marker Light, Side Clearance Light, ABS Light, Turn Signal Light, Brake Light, Plate Light, 3 Middle Rear ID Lights, and 2 Corner Rear ID Lights (optional - both if working). The bottom panel, titled 'DOCUMENTS & CONDITION', includes a 'Hazard load' toggle, a 'KPRA destination group' with three radio button options (CA/FL, TN/SC/NC/VA/WV/MD/PA/VT/NH/NJ/AL/RI, CT/NY/WI/MN/IN), and checkboxes for 'Registration verified', 'Inspection paper verified', 'BOL present', 'Sticker verified', 'ELD mentioned', and 'Checklist sent'. A note at the bottom states 'Inspection paper or sticker - one of the two is enough.'

CHASSIS ROWS Two extra checks that only exist when the Chassis toggle is on.

Step 5 — Documents & condition

8

Work across the panel: hazmat, KPRA group, the six checkboxes, weight, condition.

This screenshot shows the 'DOCUMENTS & CONDITION' section of the UGL interface. It features a 'Hazard load' toggle, a 'KPRA destination group' with three radio button options (CA/FL, TN/SC/NC/VA/WV/MD/PA/VT/NH/NJ/AL/RI, CT/NY/WI/MN/IN), and checkboxes for 'Registration verified', 'Inspection paper verified', 'BOL present', 'Sticker verified', 'ELD mentioned', and 'Checklist sent'. Below these are input fields for 'Weight' (41,250 lbs), 'Trailer Condition' (Good), and 'Condition Notes' (Optional). A 'Needs scale' checkbox is also present. At the bottom, there are 'Create Ticket' and 'Save Draft (Still Sending)' buttons. A note at the bottom states 'Inspection paper or sticker - one of the two is enough.'

DOCUMENTS & CONDITION Inspection paper or sticker — one of the two is enough.

FIELD	WHAT TO DO	BLOCKS QC?
Hazmat load	Leave off unless the load really is hazmat. Turning it on starts a live GPS watch on that truck and alerts the whole team if it moves.	No
KPRA destination group	Pick the group that matches where the load is going — CA/FL 40ft, the 41ft group, or the 43ft group. It's the kingpin-to-rear-axle limit you must remind the driver about.	No
Registration verified	Tick when you've seen the registration.	Yes
Inspection paper verified	Tick when you've seen the inspection paper.	Yes — or sticker
Sticker verified	Tick when you've seen the sticker instead.	Yes — or inspection
BOL present	Tick when the bill of lading is in hand.	Yes
ELD mentioned	Tick when you reminded the driver about the ELD.	No
Checklist sent	Tick when the checklist went out to the driver.	No
Weight	Free text — 41,250 lbs, CRVR, pending scale. Write what you actually know.	No
Trailer Condition	Good / Fair / Damaged, plus notes if it isn't Good.	No

INSPECTION OR STICKER — NOT BOTH

The line above the checkboxes says it: *“Inspection paper **or** sticker — one of the two is enough.”* Ticking both is fine, ticking neither is what holds the ticket back.

Step 6 — Needs scale & the balancer

9

Tick **Needs scale** if this load has to cross a scale. The app warns you straight away: *“Ticket will be saved to Carryover until the scale ticket arrives.”* A **Scale ticket received** box appears next to it — leave it empty until the ticket is actually in your hand.

Ticking Needs scale also opens the **DOT Predictive Balancer**.

DOT PREDICTIVE BALANCER Type the three axle weights and it writes the fix for you.

1. Type the three scale weights — **Steer** (limit 12,000), **Drive** (34,000), **Trailer** (34,000).
2. Anything over its limit turns red and the header flips from **LEGAL** TO **ROLL** to **OVERWEIGHT**.
3. Read the **Action Plan** at the bottom: which way to slide, how many holes, and a safe maximum fuel level.
4. Drag the 5th-wheel and tandem sliders to test a move before you tell the driver to make it.

THE BALANCER IS A SCRATCH PAD

Nothing you type into it is saved or sent anywhere. It's a calculator for you, on the spot. Use it freely; press **Reset data** when you're done.

Step 7 — Save

10

Two buttons at the bottom:

Create Ticket

Files it into the real workflow. It becomes **PENDING QC** if everything's satisfied, otherwise **AWAITING DRIVER**. The form then clears for your next truck.

Save Draft (Still Sending)

Parks it. QC can't see it, it won't show on Carryover, and it won't appear in shift notes. The form clears so you can start another truck. Pick it back up from Active Drafts.

The screenshot shows the UGL mobile app interface. On the left is a sidebar with navigation options: New Pickup, Carryover (with a red badge '3'), All Pickups, Notes, Trailer Issues (with a yellow badge '5'), Leaderboard, and My Pickups. Below the sidebar, there's a section for 'ACTIVE DRAFTS (9)' showing a draft for '0156' with a status of 'No photo'. Below that, it says 'jmartinez - EMPLOYEE' and 'CITY Local' with a 'Log out' button. The main form area has a 'LIGHTS' section with various light status toggles (Left/Right) for Front Clearance, Side Marker, Side Clearance, ABS, Turn Signal, Brake, Plate, and 3 Middle Rear ID Lights. Below this is a 'DOCUMENTS & CONDITION' section with a 'Hazard load' toggle, a 'KPRA destination group' dropdown, and checkboxes for 'Registration verified', 'Inspection paper verified', 'ELD mentioned', 'BOL present', 'Sticker verified', and 'Checklist sent'. There are also fields for 'Weight' (with a dropdown), 'Trailer Condition' (with a dropdown), and 'Condition Notes'. At the bottom of the form, a green banner reads 'Ticket created -- complete, sent to QC review.' Below the banner are two buttons: 'Create Ticket' and 'Save Draft (Still Sending)'.

GREEN BANNER “Complete, sent to QC review” — it made the gate. Read this line every time.

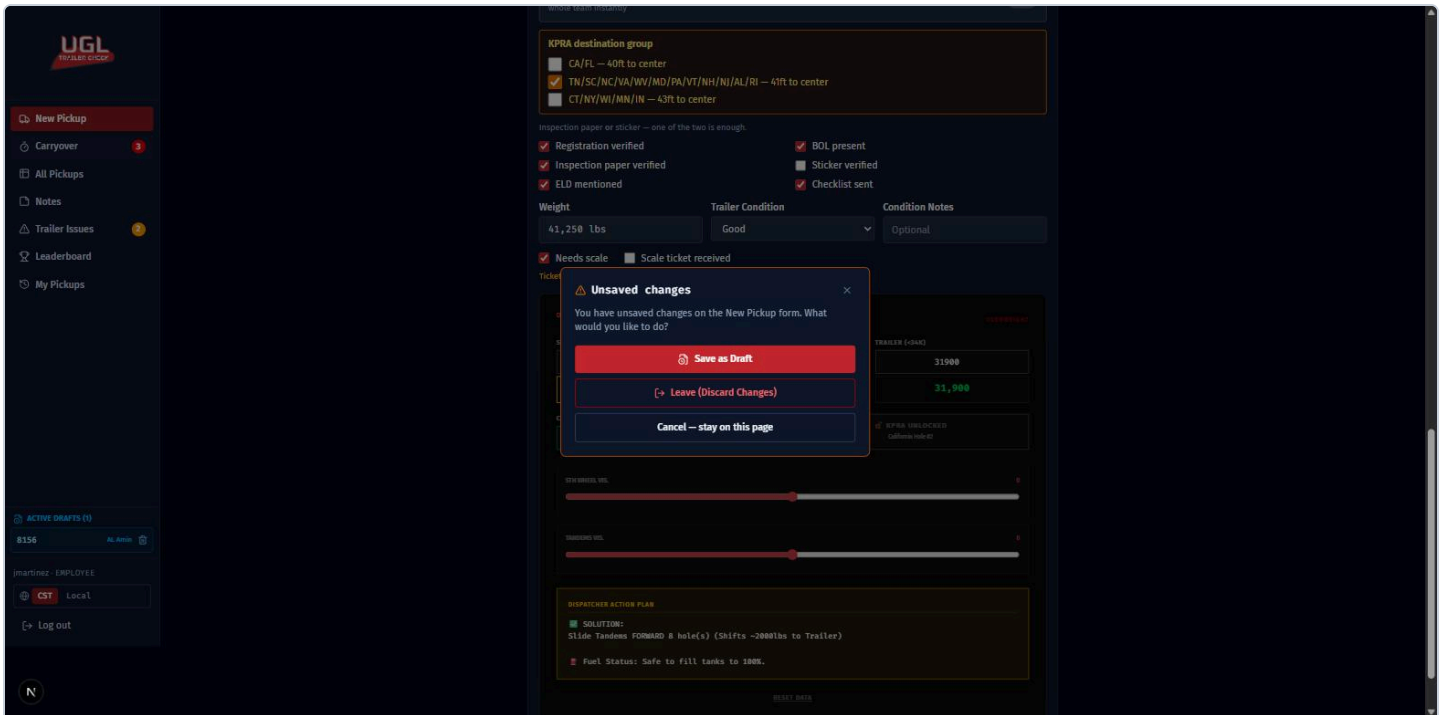

The green banner tells you which of the two happened. If it says the ticket went to Carryover instead, something on the list in chapter 6 is still missing.

Juggling several trucks at once

This is what Save Draft is for. Park truck A, start truck B, park B, come back to A from the **Active Drafts** panel in the sidebar. Nothing you parked is ever counted against you — drafts are invisible to QC and to the leaderboard until you submit them.

DON'T LOSE A HALF-TYPED FORM

If you click away with unsaved changes, this appears. **Save as Draft** keeps your work. **Leave (Discard Changes)** throws it away and cannot be undone.

UNSAVED CHANGES Appears on any navigation away from a dirty form, including Log out.

05 A PICKUP, CLICK BY CLICK

The last chapter explained every field on the form. This one does *one* pickup from the first click to the green banner, in the exact order you would do it with a driver waiting. Follow it once with a real truck in front of you and you won't need it again.

THE PICKUP WE'RE DOING

Driver at the gate. Truck **3318**, carrier **AL Amin**, already hooked to trailer **TRL-4412**. Registration and inspection paper in your hand, BOL in the cab, PTI video just came through on your phone, and the load isn't crossing a scale. That's the ordinary case — the awkward versions are at the end of this chapter.

Open the form

1

Click **New Pickup** in the sidebar. You get an empty form with the Truck panel at the top. Nothing is saved and nothing is sent anywhere until you press a button at the bottom, so you can look around freely.

WHERE YOU START Two red stars on the whole form: Motor Carrier and Truck Number. Everything else you earn as you go.

Carrier before truck

2

Open the **Motor Carrier** dropdown and pick AL Amin. Do this *before* you type the truck number — the lookup only searches inside the carrier you picked, so a truck typed under the wrong carrier simply won't be found.

3

Type 3318 into **Truck Number** and take your hands off the keyboard for about a second. Four fields fill themselves in: Driver James Carter, Location Chicago, IL – Yard 4, Model 2021 Volvo VNL 860, Fuel 63.

Read them. If the driver's name isn't the person standing in front of you, type over it — all four fields are yours to correct, and your correction is what QC sees.

AFTER THE LOOKUP Four fields you didn't type. Check them against the truck in the yard — don't just accept them.

NOTHING FILLED IN?

You get a small grey hint instead of the four fields. Nine times out of ten that's the wrong carrier or a typo in the number. Fix it if you can; if the truck is genuinely new, type the driver and location by hand and carry on. It does not block anything.

The pop-up about last time

4

The moment you finish the truck number, a box appears: **Still using trailer TRL-4412?** It is showing you what this truck pulled on its last ticket — the trailer number, the last PTI date (09/13/2026), which papers were verified then, and whether any trailer docs are on file.

The driver is on the same trailer, so click **Yes, same trailer**. That types TRL-4412 and the PTI date into the form for you.

IT FILLED IN TWO FIELDS. IT VERIFIED NOTHING.

Every checkbox is still empty after you click Yes, and that is deliberate. The papers and the PTI you are about to tick are for *this* load, today. Last week's ticket proves nothing about the trailer in front of you.

Trailer and papers

5

Look at the trailer's own plate and check it against the **Trailer Number** box. If the pop-up never appeared — new truck, or a different trailer this time — type the number in yourself. It is technically optional, and you should type it every single time anyway. The next step is why.

6

With a trailer number present, the **Saved papers** box appears. The pop-up told us `Trailer Docs: None on file`, so nobody has ever uploaded this trailer's papers. Do it now: **Save Inspection paper** and **Save Registration paper**, either by choosing a file or by hitting **Paste** with a photo on your clipboard.

A MINUTE YOU SPEND ONCE

Those files are filed against `TRL-4412`, not against this ticket. When that trailer rolls back in next month behind a different truck on somebody else's shift, the papers are already there. If the box already shows files, you have nothing to do here.

If the Paste button seems to do nothing, click it a second time and press `Ctrl+V` — the browser wants the keystroke before it hands over the clipboard.

7

LOT Trailer stays *off*. This trailer arrived with the load. You only flip it on for a trailer that was already sitting on our lot, and flipping it on makes the trailer number required and brings the 7-day PTI rule into play.

PTI — the step people get wrong

8

Watch the driver's video properly, then tick the **master PTI checkbox** — the one in the red outline at the top of the panel. That single box is what marks PTI done, and it is the only part of this panel QC's gate reads.

Now record what you saw: **Select All** at the top right if the video covered everything, or tick rows one at a time if it didn't. The bottom of the panel writes you a receipt — `PTI status: VERIFIED (master checkbox) · video log: 25 item(s) noted`. Read that line before you move on.

3 Middle Rear ID Lights

2 Corner Rear ID Lights (optional — both if working) (Left) (Right)

PTI status: VERIFIED (master checkbox) - video log: 25 item(s) noted

BOTH HALVES DONE Master box ticked *and* the log filled in. The green line is your proof.

25 TICKS AND NO MASTER BOX MEANS PTI IS NOT VERIFIED

Going down all 25 rows and leaving the red-outlined box empty is the most common mistake on this form. The list is a log. The master box is the answer. Tick the box.

Is this a Chassis? stays off — a chassis adds two more rows about the locks, and this is a dry van.

Documents & condition

9

Work down the panel. **Hazmat load** off — it isn't hazmat, and turning it on puts a live GPS watch on the truck and alerts the whole team. Pick the **KPRA destination group** that matches where the load is going; ours is the 41ft group, and that is the kingpin limit you remind the driver about.

Then the checkboxes, with the papers in your hand as you go:

- **Registration verified** — you're holding it. Tick.
- **Inspection paper verified** — holding that too. Tick. **Sticker verified** can stay empty: one of the two is enough.
- **BOL present** — it's in the cab. Tick.
- **ELD mentioned** and **Checklist sent** — tick each one once you've actually done it. Neither blocks the ticket, and QC will flag you for leaving them blank anyway.

The screenshot shows the UGL mobile app interface. On the left is a sidebar with navigation options: New Pickup, Carryover (3), All Pickups, Notes, Trailer Issues (5), Leaderboard, and My Pickups. The main screen displays a checklist of vehicle inspection items, each with a status indicator (checkmark or 'X'). The 'DOCUMENTS & CONDITION' section is highlighted, showing checkboxes for 'Registration verified', 'Inspection paper verified', 'ELD mentioned', 'BOL present', 'Sticker verified', and 'Checklist sent'. The 'Weight' field is set to '41,250 lbs' and 'Needs scale' is unchecked. The 'Trailer Condition' is set to 'Good' and 'Condition Notes' is 'Optional'. A 'Create Ticket' button is visible at the bottom.

HOW IT SHOULD LOOK Sticker left empty because the inspection paper is ticked. Condition Good, so no notes needed.

10

Weight is free text — type 41,250 lbs, or CRVR, or pending scale. Write what you actually know, not a guess. Set **Trailer Condition** to Good; anything other than Good needs a line in **Condition Notes** saying what is wrong with it.

11

Needs scale stays off for this load. If it did have to cross a scale you would tick it, the app would warn you that the ticket is parked on Carryover until the scale ticket arrives, and the DOT Predictive Balancer would open underneath for the three axle weights.

Check before you click

12

Five seconds, top to bottom, every time. These five are the only things that decide whether this ticket goes to QC or lands on your own Carryover board:

- 1 Registration verified — ticked?
- 2 Inspection paper *or* sticker — one of them ticked?
- 3 BOL present — ticked?
- 4 Needs scale off, or the scale ticket already in hand?

Save it

13

Click **Create Ticket**. A green banner comes back and the form clears itself for your next truck.

The screenshot shows the UGL mobile app interface. On the left is a sidebar with navigation options: New Pickup, Carryover, All Pickups, Notes, Trailer Issues, Leaderboard, and My Pickups. The main area displays the 'Create Ticket' form. The 'LIGHTS' section has checkboxes for various lights (Front Clearance, Side Marker, Side Clearance, ABS, Turn Signal, Brake, Plate, 3 Middle Rear ID, 2 Corner Rear ID). The 'DOCUMENTS & CONDITION' section includes a 'Hazard load' toggle, a 'KOPRA destination group' dropdown, and checkboxes for 'Registration verified', 'Inspection paper verified', 'ELD mentioned', 'BOL present', 'Sticker verified', and 'Checklist sent'. There are also fields for 'Weight', 'Trailer Condition', and 'Condition Notes'. At the bottom, a green banner reads 'Ticket created — complete, sent to QC review.' Below the banner are buttons for 'Create Ticket' and 'Save Draft (Still Sending)'.

THE LINE THAT MATTERS “Complete, sent to QC review” means it made the gate. Read this banner every single time.

The banner is the whole answer. Complete, sent to QC review means you're done: the ticket is **PENDING QC** and it's QC's move. If it says the ticket went to Carryover instead, one of the five checks above isn't satisfied — chapter 6 is the full list.

14

Open **My Pickups** if you want to see it with your own eyes: truck 3318 sits at the top of the list with a **PENDING QC** badge. That is the pickup finished from your side.

The same pickup when it isn't tidy

Three things go sideways often enough to be worth knowing by heart. None of them is a reason to stop.

The PTI video hasn't arrived

Leave the master box empty. An amber strip appears — tick **Driver called** and **Informed carrier dispatch** as you do them. Click Create Ticket anyway: it saves as **AWAITING DRIVER** and waits for you on Carryover. Those two ticks are your proof that you chased it.

The phone rings halfway through

Save Draft (Still Sending). QC never sees a draft and it doesn't touch your score. Pick it back up from **Active Drafts** in the sidebar when you're free. If you click away without saving, the Unsaved changes box offers you the same thing — take it.

It's one of our own lot trailers

Flip **LOT Trailer** on. The trailer number becomes required and a **Last PTI Date** appears. Under 7 days old and you're clear; 7 days or more and the line turns amber — get a fresh PTI and tick the master box.

THE WHOLE CHAPTER IN ONE BREATH

Carrier, truck, wait a second. Confirm the trailer. Papers on file. Watch the video, tick the master box. Registration, inspection, BOL. Weight and condition. Read the green banner.

06 THE FIVE RULES THAT SEND IT TO QC

A ticket becomes **PENDING QC** the instant all five of these are true — and not one second before. Nothing else on the form matters to the gate.

1 **Registration verified** is ticked.

2 **Inspection paper verified** or **Sticker verified** is ticked. Either one.

3 **BOL present** is ticked.

4 If **Needs scale** is on, **Scale ticket received** is also ticked.

5 **PTI passes**: the master PTI box is ticked — or it's a LOT trailer whose last PTI is under 7 days old.

WHAT IS NOT ON THIS LIST

ELD mentioned, Checklist sent, Weight, KPRA group, Trailer Condition and the 25-item PTI log do **not** hold a ticket back. Fill them in anyway — QC can and will flag you for leaving them blank, which costs you score. They just aren't what the gate reads.

The gate is re-checked *every single time you save anything*, including a single tick on the Carryover board. That's why a checkbox there can make a row vanish: it just completed the gate and jumped into the QC queue.

07 CARRYOVER & THE SCALE CHASE

Carryover is your to-do list. It has two halves: cards at the top for anything QC flagged, and a table underneath for everything still waiting on a scale ticket.

#	TRUCK #	CREATED	STATUS	MC	DRIVER	TRAILER #	WEIGHT	WAITING	REG.	INSP.	STICKER	BOL	ELD	CLST	PTI	DRIVER CALLED	INFORMED DISP.	SCALE TKT	CREATED BY	ACTIONS

CARRYOVER Action Required cards above; the scale-chase table below.

The scale-chase table

A row appears here the moment you tick **Needs scale**, and it leaves the instant you tick **Scale Tkt**. That is the only way off this board. Its status — even **APPROVED** — makes no difference.

Reading the timers

#	TRUCK #	CREATED	STATUS	MC	DRIVER	TRAILER #	WEIGHT	WAITING
1	● 4005	Sep 20, 6:54 AM	Awaiting driver	Abbas Corp	—	61044	—	379 min
2	● 2891	Sep 20, 4:14 PM	Awaiting driver	AL Amin	Tanya Boyd	TRL-3	pendi	326 min
3	⚠ 4417	Sep 20, 4:14 PM	Awaiting driver	Abbas Corp	Chris Naylor	TRL-9	pendi	163 min
4	5533	Sep 20, 4:14 PM	Approved — scale pending	AL Amin	Gary Fields	TRL-2	42,30	82 min
5	6042	Sep 20, 4:14 PM	Awaiting driver	AL Amin	Ray Okonjo	TRL-7	pendi	29 min

WAITING TIERS Red dot = 4h+, amber circle = 2h+, plain = under 2h. The small clock icon is “Followed up”.

TIER	WAITING	WHAT YOU SEE	DO THIS
Normal	under 2h	Plain row	Nothing yet.
Warning	2h – 4h	Amber row, pulsing warning circle	Chase the driver or the scale house.
Critical	4h+	Red row, pulsing red dot, sorted to the very top	Chase it now and put it in the shift notes.

The buttons on a row

Followed up (clock icon)

Next to the truck number. Press it when you've chased the driver again — it restarts the waiting timer and clears the overdue colour. The *original* request time stays on record permanently, so this is not a way to hide a delay.

Checkbox columns

Reg, Insp, Sticker, BOL, ELD, CklSt, PTI, Driver Called, Informed Carrier, Scale Tkt. Tick one and it saves immediately — no Save button, no modal.

Trailer # and Weight cells

Click the text, type, then press Enter or click away. It only saves if you actually changed it.

Dropped (box icon)

The truck dropped its trailer and there's nothing left to process. It freezes the ticket and takes it off every active board. It stays in the history.

GREYED-OUT ROWS

Rows created by another team member show with their checkboxes disabled. That's deliberate — you can see their work but you can't edit it. QC and managers can.

08 WHEN QC FLAGS YOU

A flag is not a telling-off. It's a list of exactly what to fix, with the QC's own words attached. Fix it, resend it, move on.

How you find out

- A red pop-up at the bottom-right: *"QC flagged your ticket for truck 1265 — see Action Required."*
- The red number on the **Carryover** item in the sidebar goes up and pulses.

Reading the card

Each Action Required card shows the truck number, one red tag per problem (Missing sticker, Incorrect weight...), and a **QC notes** line with the reviewer's explanation. Underneath is the same row of checkboxes as Carryover, so you can fix most things without leaving the page.

1

Read the tags and the QC note. Do the real-world work — get the sticker photo, re-weigh, chase the paper.

2

Tick the boxes on the card that are now true, or press **Open full form** if you need the whole intake screen.

3

Press **Fixed — resend to QC**. The card disappears and you get a confirmation line.

RESENT “Fixes submitted — back in the QC queue.” The count drops by one.

Urgent flags

A card with a pulsing **URGENT — ANYONE CAN FIX** badge is open to the whole floor, not just whoever created it. If you fix someone else's urgent flag you earn a **+5 teamwork bonus**. If you're free and one is sitting there, take it.

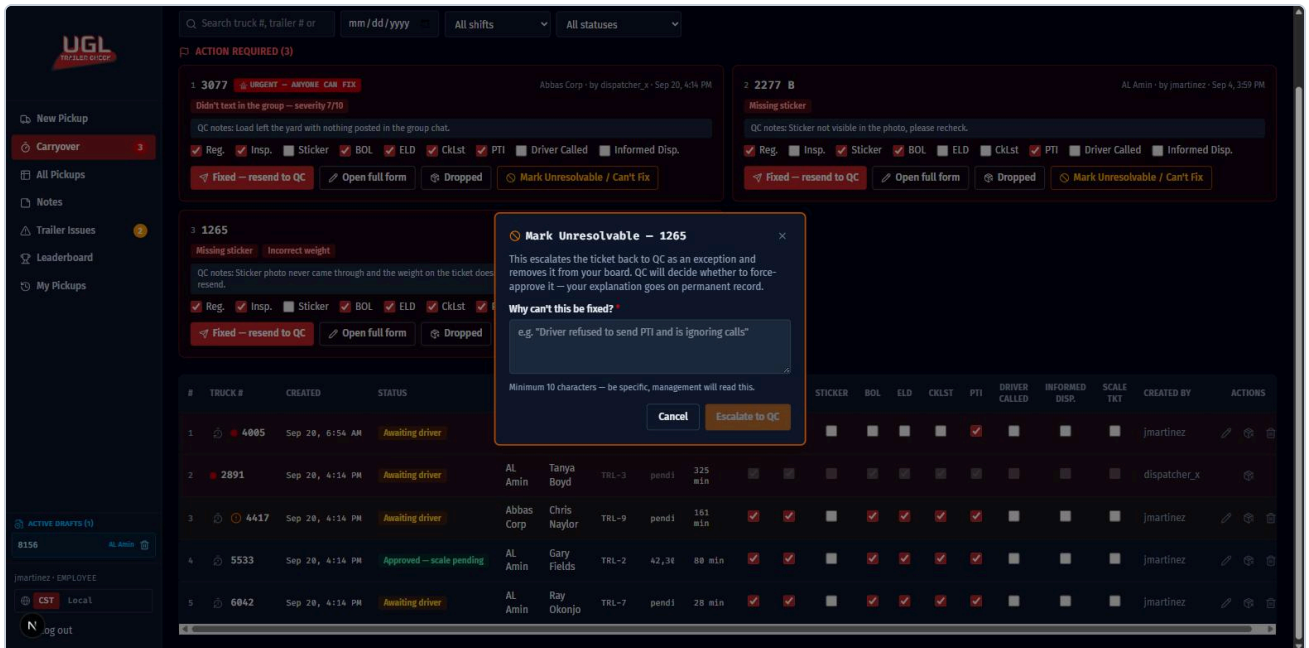

MISTAKE PRIVACY

A normal flag is visible only to you, QC and managers. Nobody else on the floor sees it. Urgent flags are the deliberate exception, because they need the whole team.

When you genuinely can't fix it

1

Press **Mark Unresolvable / Can't Fix** on the card.

ESCALATION A written reason is mandatory — at least 10 characters, and management reads it.

2

Write what actually happened — *“Trailer left the yard before we could photograph the registration. Owner-operator unreachable until Monday.”* Vague reasons come straight back to you.

3

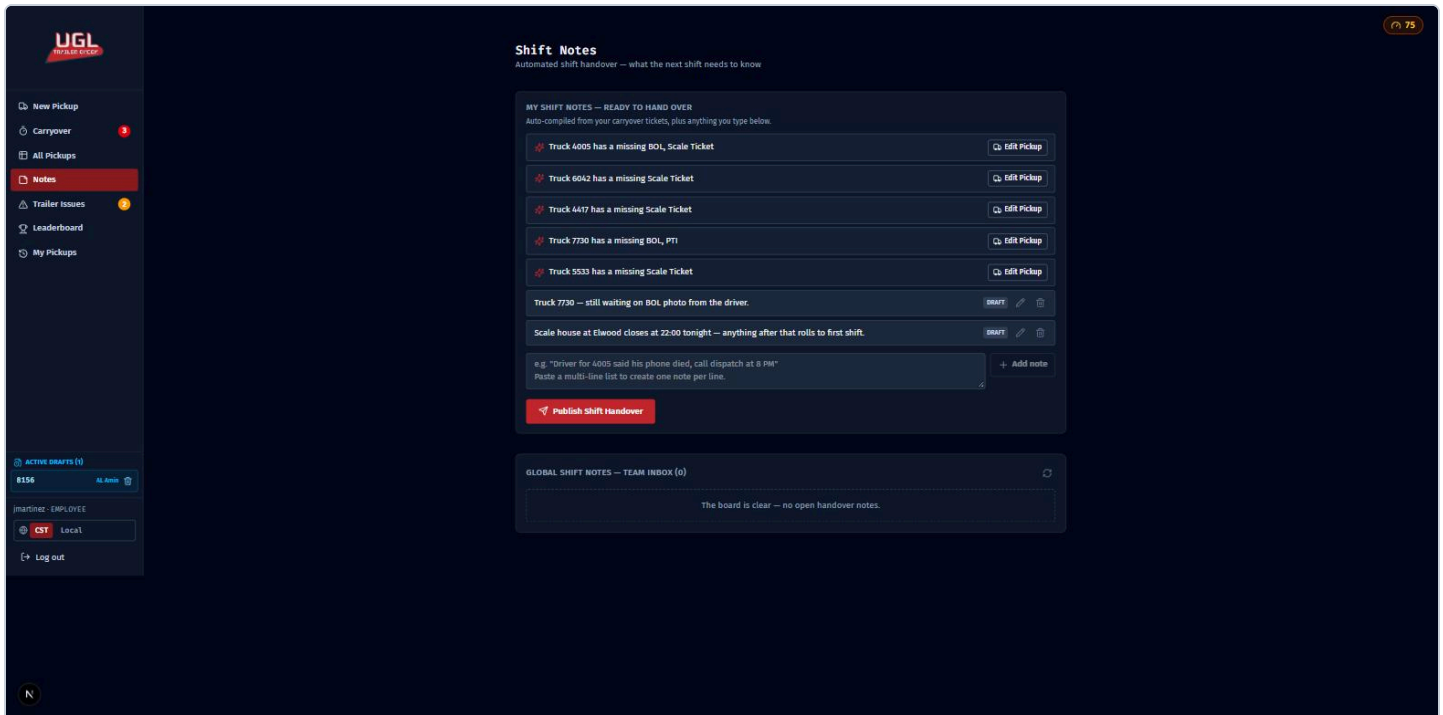

Press **Escalate to QC**. It leaves your board and lands in QC's queue as an **Exception Review**. QC either force-approves it with your explanation permanently attached, or flags it again and it comes back to you.

USE THIS SPARINGLY

This is for things that are physically impossible to fix — not for things that are inconvenient or that you'd rather do tomorrow. Every escalation is on permanent record with your name on it.

09 SHIFT NOTES & HANDOVER

The handover writes most of itself. Your job at the end of a shift is to read it, add anything the app can't know, and publish.

BEFORE PUBLISHING Auto-written gaps (sparkle icon) and your own typed notes, all still private.

1

Open **Notes**. The lines with a sparkle icon were written automatically from your own open tickets — one line per truck, listing exactly what's missing. Nobody types these.

Each has an **Edit Pickup** button. If you can close the gap right now, do it — the line disappears by itself.

2

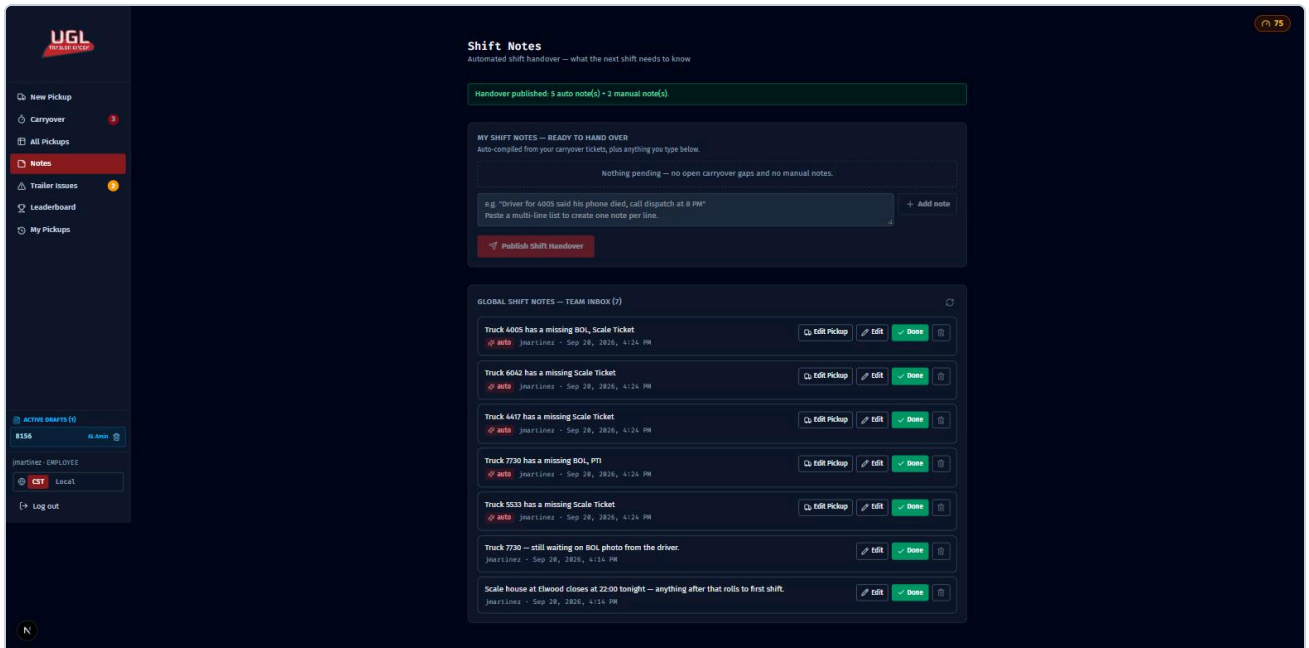

Add anything the app can't know in the text box: *“Scale house at Elwood closes at 22:00 tonight.”*

ONE LINE = ONE NOTE

Every non-empty line in that box becomes its own separate note. Paste a five-line list and you get five notes the next shift can tick off one at a time — not one paragraph they have to read whole.

3

Press **Publish Shift Handover**. Everything moves to the **Global Shift Notes — Team Inbox**, where the next shift sees it.

AFTER PUBLISHING Seven notes now on the team board, each with its own Done button.

4

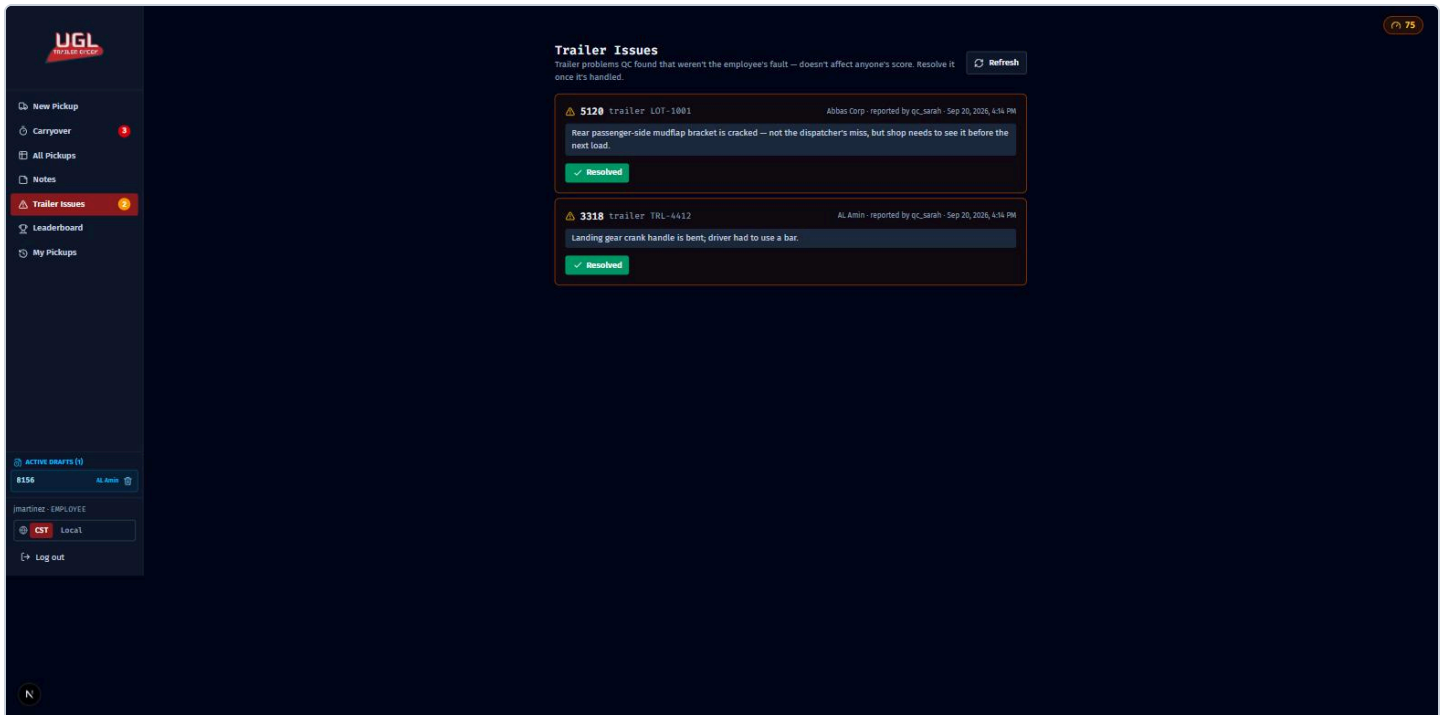

Coming on shift, read the Team Inbox first. Press **Done** on anything you've dealt with so the board stays honest.

PUBLISH ONCE

A line that's already on the team board won't be published twice. If you delete or reword a published note, it is not silently re-created — so don't delete something you still need.

10 TRAILER ISSUES

When QC finds something physically wrong with a trailer that isn't a team member's mistake, they file a trailer issue instead of flagging anyone.

TRAILER ISSUES Broken equipment, not human error. Zero effect on anyone's score.

THIS IS NOT A FLAG

A trailer issue costs nobody any points, doesn't block an approval and doesn't appear on anyone's record. It's a broadcast to the whole team that a piece of equipment needs attention.

Anyone can press **Resolved** once it's genuinely handled — the trailer went to the shop, or the part was replaced. While any issue stays open the amber badge sits on the sidebar and the app will nudge the floor about it roughly every two hours.

ALL PICKUPS Read-only, refreshes itself every 20 seconds. Note the red HAZMAT badge on 9401.

Use this before you start a pickup to check nobody has already done that truck today. Two sections: **Active Pickups** (everything still moving, all employees) and the **Full Sheet** (every ticket ever). A dash in a tick column means "not applicable"; n/a in the SCALE column means the load never needed one.

12 YOUR SCORE & THE LEADERBOARD

There are two numbers and they mean different things. Don't confuse them.

1. Your score pill (top right of every page)

A running tally. Everyone starts at 100 and it never drops below 0.

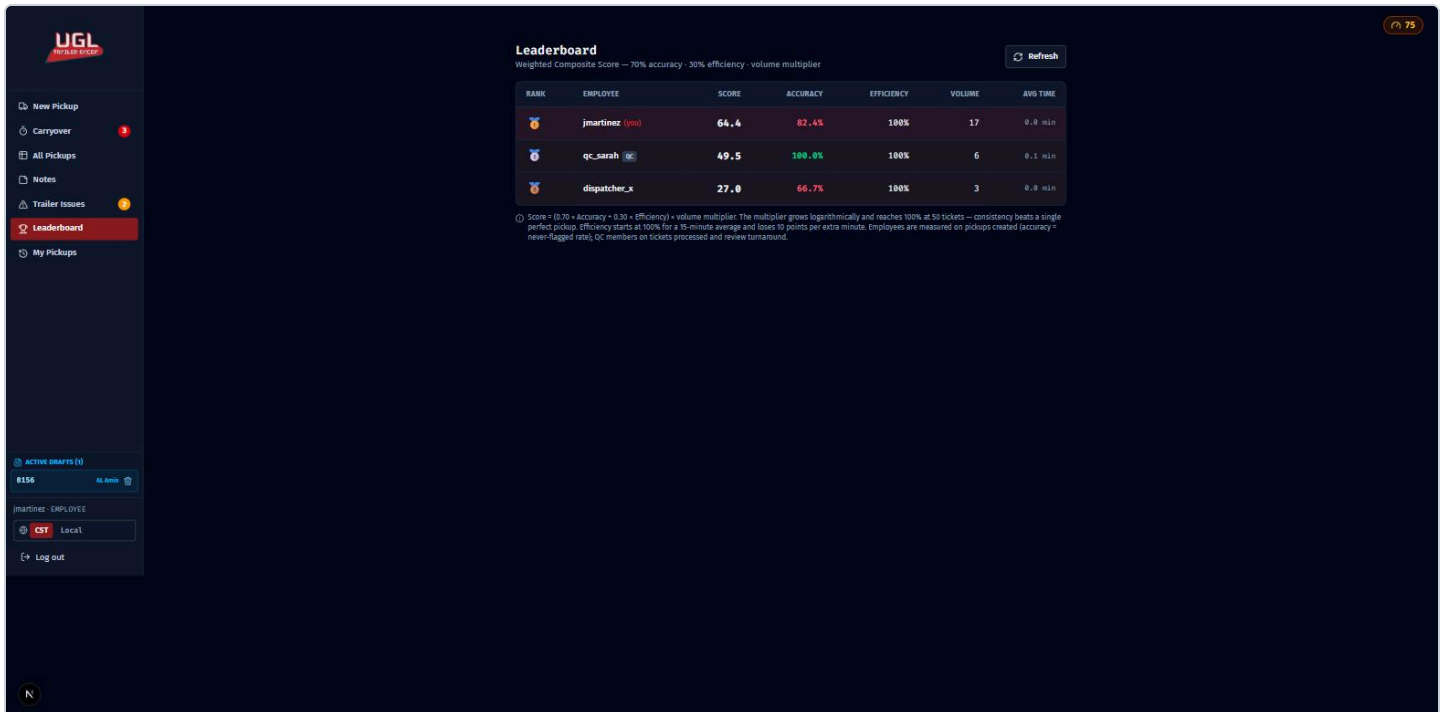

EVENT	CHANGE
Your ticket gets approved	+10
You fix an <i>urgent</i> flag somebody else created	+5
Flagged — Missed PTI	-20

EVENT	CHANGE
Flagged — Missing BOL	-15
Flagged — Missing Registration	-15
Flagged — Missing Inspection	-15
Flagged — PTI video missing the light test	-15
Flagged — Incorrect Weight	-10
Flagged — Missing Sticker	-10
Flagged — Didn't remind the driver about KPRA law	-10
Flagged — Didn't text in the group	-1 to -10 (QC sets the severity)
Flagged — Other	-5

ONE FLAG CAN CARRY SEVERAL CATEGORIES

QC can tick more than one box on a single flag, and **each one costs you separately**. A flag for "missing sticker + incorrect weight" is -20, not -10.

2. The leaderboard score

LEADERBOARD Recalculated live from your whole history — not the same number as your score pill.

This is worked out fresh from your record, not accumulated:

Accuracy — 70% of it

The share of your tickets that were **never** flagged. One flag marks that ticket forever, even after you fix it.

Efficiency — 30% of it

How long from creating a ticket to it reaching QC. Under 15 minutes on average scores 100; you lose 10 points for every extra minute.

Volume multiplier

Scales with how many tickets you've done, reaching full weight at 50. One flawless pickup scores about 17, not 100 — consistency beats a lucky single.

HOW TO SCORE WELL

Finish tickets promptly and don't get flagged. Both halves reward the same habit: do the checks properly the first time, and don't leave a half-finished ticket sitting for an hour before you complete it.

13 QUICK REFERENCE

Your shift, start to finish

- 1 Sign in. Read the **Notes** → **Team Inbox** the previous shift left you.
- 2 Check **Carryover**: clear the red badge (flags) and chase anything red or amber in the scale table.
- 3 Work pickups in **New Pickup**. Park what you can't finish with **Save Draft**.
- 4 Re-check your drafts and Carryover once an hour — the app will nudge you.
- 5 Before you leave: open **Notes**, read the auto-written lines, add anything else, **Publish Shift Handover**.

Common problems

WHAT YOU SEE	WHAT IT MEANS	WHAT TO DO
Driver/location won't auto-fill	Truck isn't in that carrier's fleet.	Check the Motor Carrier, then the truck number. Type the fields by hand if needed — it doesn't block you.
Green banner says it went to Carryover	One of the five gate rules isn't met.	Go to chapter 6 and work down the list.
“LOT Trailer tickets require a trailer number”	LOT is on with an empty trailer number.	Type the trailer number, or turn LOT off.
Amber “PTI is 7 day(s) old”	This LOT trailer's PTI is stale.	Get a fresh PTI and tick the master box.
A row vanished when I ticked a box	That tick completed the gate — it went to QC.	Nothing. That's the system working. Find it under My Pickups.
Paste button does nothing	The browser blocked the clipboard read.	Click Paste again, then press Ctrl+V within 20 seconds.
Checkboxes greyed out on Carryover	Another team member created that ticket.	Ask them, or ask QC/a manager to change it.

WHAT YOU SEE	WHAT IT MEANS	WHAT TO DO
Full-width red bar at the top	A hazmat-marked truck is moving.	Tell your manager straight away.

Things that are easy to get wrong

- The **master PTI box** is what counts. Ticking all 25 items without the master box means PTI is *not* verified.
- **Inspection or sticker** — one is enough. Neither is not.
- **Approved ≠ off Carryover** if a scale ticket is still outstanding.
- **Confirming “same trailer”** fills in the number and date. It does not verify papers or PTI.
- **Drafts are invisible** to QC. A parked draft is not a submitted ticket.
- **Hazmat** is not a routine checkbox. Turning it on alerts the entire company.

UGL Trailer Check — Team Handbook. Screenshots taken from the live application with practice data. If something in the app doesn't match this book, the app is right and this book is out of date — tell your manager so it can be corrected.
